

# Pesticide Registration Notice Status Report

Draft of August 8, 2014

Pesticide Registration Notices are guidance documents released by OPP that inform pesticide registrants and other interested persons about important policies, procedures and regulatory decisions. The Policy and Regulatory Services Branch is reviewing old PR-Notices dating back from 1949 to 2012 to determine their statuses. PR-Notices potentially viewed as current are being sent out to the appropriate source for official ruling on if they are in fact current or superseded. The out of date and superseded PRNs are being archived and kept track of in this report and in FEAD files. <sup>i</sup> Chart 1, below, documents the status of PRNs used by the EPA from 1949 – 1970. Chart 2, contained in a separate file, covers PRNs from 1971 – through 2012.
